

Correction to FOS Flat Field Reference Files Guide
(CAL/FOS-090)

A. KINNEY
SIB

Cynthia J. Taylor
Space Telescope Science Institute

June 1993

Two typographical errors were found in the matrix of FOS flat field reference files. The corrected matrix is enclosed.

The first error is in Table 1. The entry for detector = RED, grating = H19, aperture = A-1 (4.3), USE_AFTER = 19911114 should read "d1c1044hy.r1h,r1d" rather than "d1c1044qy.r1h". The incorrect entry was a reference file for the A-2 (0.5 pair), aper_pos = LOWER setting.

The second error is in Table 6 (redside polarimetry flats for H40- Pol A). The PASS 1 files should be "94616585y.r1h, .r1d" and the PASS 2 files should be "9ba0955sy.r1h,r1d". The incorrect files, "9461658by.r1h" and "9ba09588y.r1h", were appropriate for FOS/BLUE.

Finally, to make the rootnames in the tables more legible, the letter "l" has italicized ("*l*") in Postscript versions of the report and capitalized ("L") in ASCII versions found on STEIS.

This correction notice is posted on STEIS in instrument_news/fos directory as "flat_field_tables_apr93_correction.ps" and "flat_field_tables_apr93_correction.asc". Note that STEIS version of CAL/FOS 90 and paper copies available from SIB secretary, have been updated to reflect these changes as of June 10, 1993.
