

Figure 1: Measured cross-correlation offset in pixels between individual WAVECALs and pipeline-defining epoch WAVECAL. Upper panel: FOS/BL high-resolution dispersers. Lower panel: FOS/RD high-resolution dispersers.

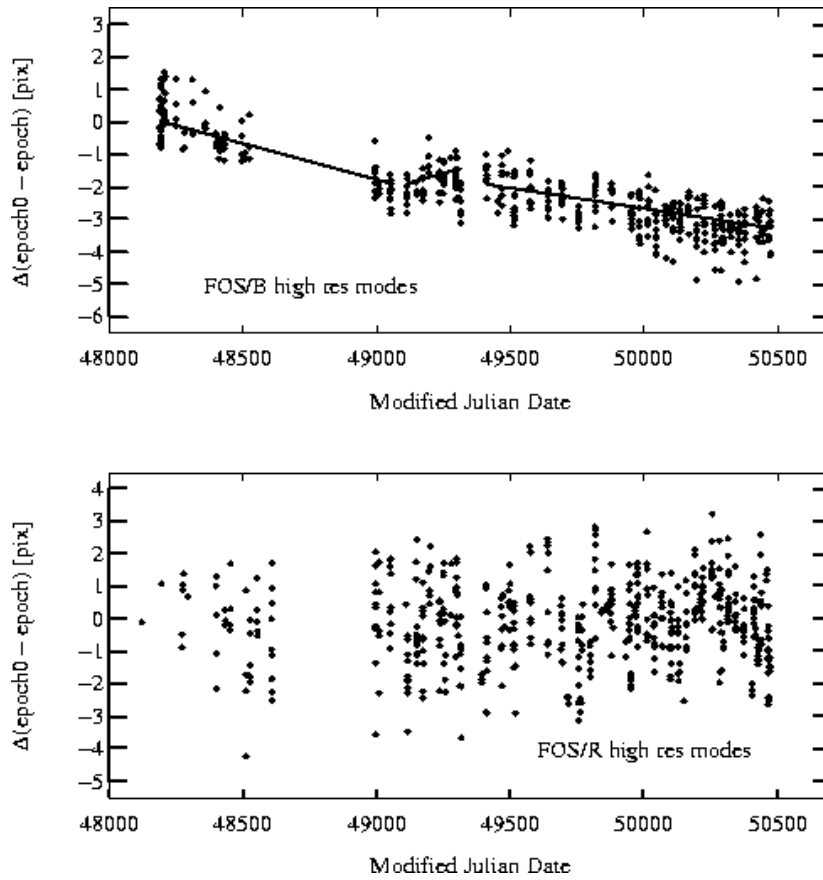

Figure 2: Filled symbols indicate mean offsets between WAVECALs and pipeline-defining WAVECAL as a function of date for FOS/BL G400H. Open symbols are the offsets after application of correction algorithm described in this report.
